^①Dolphins breathe **in a different way than** fish. ^②Fish **take** oxygen **from** the water.

^③They **don't need to** breathe air. ^④But dolphins are mammals, **just like us**. ^⑤This means

dolphins **need to** breathe air from above the water. ^⑥They go to the surface **every few**

minutes to take a breath. ^⑦**If** dolphins slept **like** humans, they could drown.

^⑧How can dolphins sleep and **still** breathe? ^⑨Nature helps them with this! ^⑩A dolphin's

brain has two parts, **like** a human's brain. ^⑪But dolphins can't sleep completely **like** we do.

^⑫**When** they sleep, they **turn off** one part of their brain. ^⑬The other part **stays awake**.

^⑭After about two hours, **the parts switch**. ^⑮They **take turns** staying awake, so each part

gets about four hours of sleep. ^⑯This way, dolphins can have **eight hours of sleep** in a day!
