

Sentence Practice

• 정답 p. 64

C 다음을 /로 끊어 읽기를 표시하고, 빨간색으로 된 부분에 유의하여 해석해 봅시다.

^①A parasite is a tiny animal **that** lives inside other animals to stay alive. ^②Some parasites
_____ can even control their hosts' brain to achieve their goal.

^③One example is the hairworm. ^④Hairworms go inside crickets and grow inside them.

^⑤When they are fully grown, they take control of the cricket's brain. ^⑥The cricket starts to
_____ act strangely. ^⑦It jumps into water because the hairworm **makes it do that**. ^⑧In the water,
_____ the hairworm comes out of the cricket's body. ^⑨Then it swims around to find another
_____ hairworm to mate with. ^⑩After they mate, the female hairworm lays eggs in the water.

^⑪But what happens to the crickets? ^⑫Poor crickets! ^⑬They become food for fish like trout.

^⑭So, hairworms **not only** keep their life cycle going **but also** help the food chain.
