¹**Far out** in space, there is an invisible monster. ²It can **pull in and swallow** everything

that comes close—even giant stars! ³The scary monster is a black hole. ⁴Where does its

power come from? ⁵The answer **lies in how** a black hole is formed.

⁶Many scientists believe that a black hole **forms when** a star gets very old. ⁷The old star

runs out of fuel and cannot support its own heavy weight. ⁸A surprising thing happens

at this stage. ⁹The star shrinks and becomes **even smaller than** a grain of rice. ¹⁰When a

massive object becomes small, its **gravitational pull becomes extremely strong**.

¹¹A black hole's gravity is **so** strong **that** it sucks in anything nearby, **just like** a vacuum

cleaner. ¹²Even light gets pulled inside a black hole. ¹³This is why a black hole **looks**

invisible. ¹⁴Its gravity is just **so** powerful **that** there **would be** no way to get out **if** you **fell**

into a black hole. ¹⁵Luckily, black holes are **far from** us!
