

Sentence Practice

• 정답 p. 71

C 다음을 /로 끊어 읽기를 표시하고, 빨간색으로 된 부분에 유의하여 해석해 봅시다.

^①Can you imagine **a tree that talks**? ^②Of course, trees cannot speak like people do.

^③However, some trees can communicate in their own special ways. ^④For instance, when a

willow tree is attacked by insects, it **sends out a chemical signal**. ^⑤This signal is a strong

scent of freshly cut grass. ^⑥Other willow trees in the area catch this scent and sense that

insects are coming. ^⑦When this happens, they quickly make a chemical in their leaves.

^⑧This chemical helps **drive the insects away**.

^⑨Similarly, poplars also use a chemical signal. ^⑩They release a warning scent when

caterpillars invade. ^⑪The scent **resembles** a citrus scent. ^⑫Then, nearby trees detect the

scent and make chemicals to protect themselves. ^⑬For these trees, their smell is a way to

communicate and protect themselves from enemies.
