

Sentence Practice

• 정답 p. 76

C 다음을 /로 끊어 읽기를 표시하고, 빨간색으로 된 부분에 유의하여 해석해 봅시다.

¹A long, long time ago, the very first living thing on Earth was a tiny, tiny bacteria.

²It was **so small that you couldn't even see it!** ³Over many, many years, this tiny bacteria
changed and grew into all sorts of amazing creatures, like fish, lizards, animals with fur,
and even people.

⁴But how did this happen? ⁵It all started with the tiny bacteria **fighting with each other.**

⁶They tried to eat each other. ⁷One day, a big bacteria swallowed a small one. ⁸But the
small bacteria didn't want to be digested. ⁹So it offered a deal to the big one. ¹⁰It said, "Let
me stay inside you, and I'll help you in return." ¹¹The big bacteria agreed.

¹²From that day on, they came to exist together. ¹³They **stopped fighting** and started
working together to survive. ¹⁴The small bacteria became a special part of the big bacteria,
like an organ. ¹⁵This special part is called a mitochondrion. ¹⁶Mitochondria are like tiny
powerhouses. ¹⁷They take food and turn it into energy for cells.

¹⁸This way of bacteria living together led to the birth of many different living things.

¹⁹When **only a few** bacteria joined, they became small creatures. ²⁰When many joined, they
became bigger animals.
